"(HS)² opened doors for me by providing academic support that boosted my confidence and made me comfortable making mistakes and asking for help. It also introduced me to the world of STEM through biomedical classes and coding opportunities that I would have never experienced at my local high school. This helped me achieve good grades and constantly push myself, knowing I could improve despite setbacks."

– **Ginika C, CO | Princeton University**

"Next year, I will be studying Biomedical Engineering at Brown University on a full-ride scholarship through QuestBridge! I owe so much to this next chapter of my life to (HS)². I wouldn't have applied to Brown University if I hadn't gotten the opportunity to speak with a Brown admissions representative and fall in love with the school during college day at (HS)²."

– **Feker W, CO | Brown University, Questbridge Scholar**

"The (HS)² program was a game-changer in helping me reach my college goals. It gave me access to rigorous coursework and supportive mentors who believed in my potential. Through the program, I gained the confidence, skills, and perseverance I needed to navigate the college application process. (HS)² didn't just prepare me for college, it made me believe that I actually belonged there."

– **Jean P, NY | Haverford College, Questbridge Scholar**

"(HS)² gave me so much confidence in my college process, especially with my essay. Having a mentor review my essay helped me organize my thoughts and put them clearly on paper. Thanks to (HS)², I finished my essay before most college applications even opened. Without the guidance and support from (HS)², I don't think I would be attending the college I am today. Thank you, (HS)², for everything—you helped me get to where I am today."

– **Ky B, LA | Lehigh University**
